### Description:

While we have a window of opportunity (although it may be brief), this will be an internal HSCD meeting to discuss the communication strategy that will be needed to support the data that is anticipated for release sometime in mid-March. The focus of this meeting will be the decisions that must be made (ex. re-sampling events, additional water supply, level of involvement of toxicologist in post-data release activities) in order to develop a communication strategy that articulate our plan of action following the release of this data.

According to your calendars (particularly Ron and Kathy), March 1 at 3PM seems to be the best available time to meet next week. Please let me know if the proposed date/time conflicts with your current schedules. Additionally, if you feel that others from the Dimock team should be involved with this initial discussion, please let me know this as well.

Thanks!

Walt
